**High-End Laser
Cutting Systems**

Products + technology

Simply thought intelligence: The eurolaser modular concept

Efficient technology made in Germany eurolaser solutions

- + Modularity for versatile expandable laser systems
- + Maximum flexibility for every application
- + Automation solutions for more productivity
- + Versatile software modules
- + Excellent results
- + Highest precision and consistently high cutting quality
- + Non-contact and chip-free laser processing
- + Reliability thanks to market-proven technology
- + Process-safe and durable thanks to high quality

Reliably on your side Focused on your success

- + Know-how and many years of experience
- + Extensive material tests before purchase
- + Advice and process optimisation
- + Excellent customer support worldwide
- + Warranty extension up to 5 years
- + Easy delivery and installation
- + System and application training
- + Fast availability of spare parts
- + Trade-in, leasing and financing

High-end laser systems
More about our laser system solutions
can be found at www.eurolaser.com

Suitable for your application eurolaser table sizes

With 10 different system sizes and the laser powers from 60 – 650 watts adapted to your requirements, we offer the optimum solution for your application.

M-LINE

> M-800

Working area: 1,330 x 830 mm (52.3" x 32.6")
Laser power: 60 – 450 Watt

> M-1200

Working area: 1,330 x 1,230 mm (52.3" x 48.4")
Laser power: 60 – 450 Watt

> M-1600

Working area: 1,330 x 1,630 mm (52.3" x 64.1")
Laser power: 60 – 650 Watt

L-LINE

> L-1200

Working area: 1,800 x 1,230 mm (70.8" x 48.4")
Laser power: 60 – 450 Watt

> L-3200

Working area: 1,800 x 3,200 mm (70.8" x 125.9")
Laser power: 60 – 650 Watt

XL-LINE

> XL-1200

Working area: 2,270 x 1,230 mm (89.3" x 48.4")
Laser power: 60 – 450 Watt

> XL-1600

Working area: 2,270 x 1,600 mm (89.3" x 62.9")
Laser power: 60 – 650 Watt

> XL-3200

Working area: 2,270 x 3,200 mm (89.3" x 125.9")
Laser power: 60 – 650 Watt

2XL-LINE

> 2XL-3200

Working area: 2,740 x 3,200 mm (107.8" x 125.9")
Laser power: 60 – 650 Watt

3XL-LINE

> 3XL-3200

Working area: 3,210 x 3,200 mm (126.3" x 125.9")
Laser power: 60 – 650 Watt

eurolaser products

You will find more information on
our products at www.eurolaser.com

Increase economic efficiency eurolaser Remote Operation

Your benefits

- + Increase in productivity
- + Loading during cutting process
- + Minimization of process breaks
- + Safety concept for material removal and loading

Double productivity eurolaser Shuttle Table System

Easy exchange of the material supports

Free access to the material

Your benefits

- + Up to 75 % increased system utilization
- + Loading and unloading parallel to the cutting process
- + Automatic table change
- + Minimized downtime
- + Easier access to the produced pieces
- + Robot connection possible

eurolaser Remote Operation

Watch the video on this automation at eurolaser.tv

eurolaser Shuttle Table System

Process automation eurolaser Conveyor System

1. Feeding unit

Automated feeding of roll material with edge control for precise material position.

2. Conveyor belt

Durable stainless steel wire mesh belts for gentle material transport.

3. Table extension

Flexible and easily accessible material removal during the machining process.

4. Winding unit

Even winding of already processed textiles.

Your benefits

- + Increased efficiency
- + Automatic material unwinding and feeding
- + Material removal during the cutting process
- + No fabric distortion due to tension-free material feed
- + Precise placement of the material on the processing table
- + Material fixation during cutting
- + Continuous cutting for very large formats
- + Smartfeed for optimum feed rate to match to the cutting data

eurolaser Conveyor System

More information on the Conveyor System can be found at eurolaser.com

Printed Material eurolaser POSITION^{plus}

Your benefits

- + Precise cuts along the print contour
- + Cutting textiles with patterns to match the layout (Pattern Matching)
- + Automatic creation of cutting data by contour detection (even without existing job data)
- + Optimum cutting results by compensating for deviations in the print, e.g. shrinkage, stretching and twists in the material
- + Minimum machine setup times
- + Faster processing speed
- + High process reliability
- + Automation of work processes

Picture engravings eurolaser PICTURE^{plus}

Your benefits

- + Creation of 2D images and 3D reliefs in photo quality
- + Engravings in large format on the entire working area
- + Cutting and engraving in one operation
- + Up to 256 gray levels and a resolution of up to 1200 dpi
- + Reduced cleaning effort due to chipless machining
- + Time-saving, since tool changes and clamping of workpieces are no longer necessary

eurolaser POSITION^{plus}

3 in 1

laser plus two
mechanical
tools

Maximum versatility

Additional tools parallel to the laser

- + Up to three tools in parallel on one machine
- + Countless combination possibilities
- + High-quality, market-proven tools from Zünd Systemtechnik AG
- + Can be combined with marking modules and camera systems for printed materials

eurolaser 3 in 1

Labeling, inscribing, marking eurolaser marking modules

With the eurolaser marking modules you can cut and mark your materials in one work step.

Ink Printer Modul

Marking of workpieces
or labels

Ink Marker Modul

Non-contact markings,
e.g. for sewing marks

Marking Modul

Drawing seams, patterns
and auxiliary lines

Label Modul

Fast and flexible
labeling

eurolaser additional options

options at eurolaser.tv

Optimum cutting results eurolaser table concepts

Our modular eurolaser table concepts tailored to your application with a sophisticated material support concept allow you to use your laser system optimally and multifunctionally.

Raster plate (RP)

Perfect for your acrylic applications

- + Absorption surface reduces reflection of excess laser energy
- + Easy to clean table concept
- + Suitable for sensitive materials

Honeycomb (HC)

Our specialist for foils and wood

- + Honeycomb structure is highly stable
- + Allows good vacuum formation under the material
- + Suitable for flat, unstable materials

Conveyor (CON)

Cutting textiles straight from the roll

- + Stainless steel wire mesh
- + Serves as material carrier and transport element at the same time
- + Suitable for light, thin and flexible materials

PIN Concept (PC)

For high laser powers

- + Stable brass or PMMA support pins
- + Suitable for high laser powers and increased smoke emissions
- + E.g. for cutting dies and wood processing > 10 mm

eurolaser table concepts

Automotive / Mobility

Precise and efficient production

- + Interior trim and upholstery
- + Heat and cable protection
- + Air and liquid filters
- + Adhesive foils
- + Passenger detection sensors
- + Fittings
- + Product labels (safety-relevant components)
- + Signs / labels
- + Radar foils
- + Number plates
- + Seals (engine compartment, doors, windows)
- + Battery housing (e.g. made from micanite)
- + Flexible printed circuits (fittings)
- + Bodywork and light-weight design made of composite materials (doors, door trims, side impact protection)
- + and much more

Living / commercial spaces

Individual and automated cutting

- + Sun protection
- + Photo prints
- + Large format / relief engravings
- + Furniture
- + Veneer inlays
- + Home textiles
- + Curtains / blackout
- + Roof
- + Soundproofing
- + Lampshades
- + Cushions
- + Furniture foils
- + Floor coverings
- + and much more

eurolaser markets

Clothing industry

Contactless processing without material distortion

- + Sport & leisure
- + Orthoses / insoles
- + Fashion & design
- + Work clothing
- + Personal protective equipment
- + Textile protective masks
- + Corporate branding
- + Shoes
- + On-demand / individualisation
- + Face shields
- + Textile finishing with laser engraving
- + and much more

eurolaser markets

Advertising / Point of Sale

Printed, engraved, illuminated

- + Displays
- + Exhibition stand/store construction
- + Soft signage
- + Shop design / interior design
- + Signs
- + Lettering
- + Inscriptions
- + 3D letters
- + Claddings
- + Customer signage systems
- + Display window design
- + Acrylic images
- + Advertising materials
- + Decoration
- + Foil inscriptions
- + Pull-up displays
- + Light banner
- + Lightbox
- + Shelf systems
- + LED backlight
- + and much more
